## TRASH CONTAINER LINERS

Ultimate Sanitary Supply offers low-density and high density Tyco brand can liners in a range of sizes and colors. All liners are constructed with strong bottom seals, providing exceptional strength. Match the liner size to the size of your container. Order 50 or more cases at a time and Ultimate will pay the freight to your domestic facility!

33 gallon	33" x 40"
38 gallon	30" x 45"
55 gallon	36" x 60", 38"58"

## HIGH DENSITY LINERS

High Molecular Weight/ High Density Polyethylene (HMW/HDPE) can liners have many advantages over Low-Density & Low Linear can liners such as: they come packed with almost twice as many bags per case resulting in greater savings and less storage space needed/ High density's greater strength properties allow customer to use a thinner bag without sacrificing the quality/ The use of less plastic in production & use is better for the environment. Ultimate Sanitary Supply High Density liners have advantages over other high density liners also. They have a star seal constructed bottom which allows them to hold more weight and easily fit into containers better than conventionally sealed bags. They are also packed in CORELESS INTERLEAVED ROLLS (see below) These rolls store, separate, and carry better than conventionally packaged bag. 'The Coreless Interleaved roll is formed by overlapping quarter folded liners lengthwise, by approximately eight inches and winding them into a strong tight roll. These rolls will not telescope or unwind during shipment or handling. When a liner is pulled from an interleaved roll, it releases neatly and easily, leaving the next liner readily accessible for use. You do not have to search for the perforation or tear one liner from another.
